GENERAL INFORMATION

Slavonski Brod, commonly shortened to simply Brod, is a city in Eastern Croatia. Being one of the principal cities in the historical regions of Slavonia and Posavina, Slavonski Brod has a population of 59.000. It's also the industrial, cultural, administrative, judicial and financial center of the Brod-Posavina County. By size, population and importance it's the second largest city in Slavonia, and the sixth largest in the Republic of Croatia. It was proclaimed the most beautiful city in Croatia, selected by the "Croatian National Tourist Board" for 2009. It is placed in the centre of Brod-Posavina County and it's a major river port on the Sava river. In the Northeastern part of the city, at the Galovo site, a rich site of early stone age culture was discovered relatively recently. Apart from the fact that it's the largest stone age site in the territory of Eastern Croatia, it is extremely important to emphasize that the material remains found confirm the 8.000 year old settlement of Brod. Scientists estimate that this is not only the oldest evidence of settlement in the city, but, in general, traces of the oldest settlement in all of Croatia. Slavonski Brod is also known for it's museums and cultural monuments, which remind us of the past centuries. One of the monuments is baroque fortress as one of the largest fortifications for protection against expansion of the Ottoman empire, named "BROD FORTRESS", and today it's a zero category monument. Slavonski Brod is recognized as a cultural and educational centre. Numerous cultural events take place in Slavonski Brod, such as theatre performances, concerts, exhibitions, fairs, and sport events.
